

THE GAZETTE.

WEDNESDAY EVENING, JULY 6, 1870.

CATCHING A FLY IN CHURCH.—A lady in one of our churches rested her head on the back of the pew in front, as all devout people do in the time of prayer, but in the pew before her sat a young man who neither bowed his head nor knee. A beautiful plume nodded and danced upon the head of the fair one behind him, occasionally touching the neck of the youth, who evidently considered it a fly or some other trouble some insect. For a time he bore the unpleasant sensation without a murmur, but at last patience ceased to be a virtue, and from the flash of his eagle eye one could plainly see that the hour of "that fly" had come. Instead of saying "shoo fly, don't bother me," cautiously his hand moved toward the supposed offending insect; then followed a frantic clutch and a spring behind him. Imagine the horror of the youth to find in his hand the nobly hat of the fair one, which he had torn violently from her head, sadly disarranging the contour of braids and chignon. The lady was indignant, of course; and the youth could have been purchased at an immense sacrifice about that time. Explanations and apologies followed, and the disorganized was put in order as soon as possible, and the devotional exercises were resumed.—(Lima, Ohio.) Gazette.

LIGHTNING RODS.—The essentials of a good rod are that it shall be well and firmly set, having points above the highest portions of the building, and enough of them to protect all the salient places; that it shall be solid to the ground, or, if made in joints, firmly united. It must be large enough to carry off any probable amount of fluid falling upon it. Not more than two separate points should join one stem to the ground, and the lower terminus must go far enough into the ground to reach moist earth; if the ground end has several branches, it is all the better; if placed in a bed of charcoal it is still better, as that is a good conductor, and also prevents rust to some extent.

To the Voters of the Seventh Congressional District of Virginia.—The name of our esteemed fellow-citizen H. O. CLAGGTON, esq., is presented to the voters of the Seventh Congressional District of Virginia as a suitable candidate to represent the said District in the next Congress. It is needless to say anything of his qualifications for the position, in our community where he is so well known, but to the voters of other portions of the field we can cordially endorse him as entitled to their confidence and support, both on account of his integrity as a man as well as for his abilities to discharge the duties pertaining to that station.

WALTHAM WATCHES.

The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects, is to decide the question as to the real value of these time-keepers.

More than 450,000 of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

The superior organization and great extent of the Company's Works at Waltham, enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent more for their watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize:

The invention and use of a centre-pinion of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's Patent pinion as being the best and faultless.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches.

All Waltham Watches have dust-proof cases, protecting the movement from dust and lessening the necessity of the frequent cleaning, necessary in other watches.

Our new patent stem-winder, or keyless watch, is already a decided success and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality now offered to the public.

To those living in all portions of the U.S. where watchmakers do not abound, watches with the above-mentioned improvements which tend to assure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every watch guaranteed by the Company. To prevent imposition, buyers should see that every watch should bear either of the following trade marks:

American Watch Co., Waltham, Mass.
Ann. Watch Co., Waltham, Mass.
American Watch Co.,
Waltham, Mass.
P. S. Bartlett, Waltham, Mass.
Wm. Ellery, Waltham, Mass.
Home Watch Co., Boston, Mass.

For sale at retail by all respectable dealers. A descriptive circular, giving much useful information, sent to any address on application. No watches retailed by the Company. Address,
ROBBINS & APPLETON,
Gen. Agts., 182 Broadway,
New York.

Ask to see the new FULL-PLATE WATCH, bearing the trade mark "AMERICAN WATCH CO., Crescent at, Waltham, Mass." It is by far the best full-plate watch made in the United States, and surpasses any thing heretofore made in this country for Railway Engineers, Conductors, &c. ap 19-60sm

SUMMER RESORTS.

CARLIN'S SPRINGS.
This favorite resort is now ready for the reception of EXCURSIONISTS, PLACED IN THE heart of its proximity to Alexandria and the cities of the District renders it the most desirable place in this section of country for a day's enjoyment. Application can be made to NATHANIEL HAYES, agent for J. L. F. Carlin, at the depot of the A., L. & H. R. R.
je 3-4f

THESE FACTS DEMAND IMMEDIATE CONSIDERATION.
Disease should be guarded against, or it must be cured. The alternatives are death or such consequences as render life a burthen. Combat the malaria, purify the blood, put the nervous system in order, regulate the female system, promote the appetite, banish every sign of dyspepsia or rheumatism, increase the vigor of both body and mind, and relieve the children of summer complaints. All this can be done with safety, certainty and promptness by Charles Gautier's Native Wine Bitters; so says popular opinion, endorsed by many of the most eminent physicians, who assure us of the complete victory of the Bitters. It has absolutely driven them out of the market where it has been introduced. Gautier's Native Wine Bitters may be had of all druggists.

R. M. LAWSON, J. JANNEY & CO.,
